# Report of the Directors (Including Management Discussion and Analysis)

### I. FACT SHEET OF THE COMPANY'S INDUSTRY AND PRINCIPAL ACTIVITIES DURING THE REPORTING PERIOD

#### (1) Industry Fact Sheet

Being the aorta of the nation's economy, a key infrastructure, a significant project for people's livelihood, the backbone of an integrated transportation system and one of the main means of transportation, the railway is of crucial importance for the nation's economic and social development. Since the State Council of the PRC approved the implementation of the Medium to Long Term Plan for Railway Network Development (《中长期铁路网规划》) in 2004, railways in China have experienced exponential development. Currently, on the whole, the tight capacity of the Chinese railways has been alleviated, the bottle neck restriction has been eliminated, and economic and social development needs have been met. However, when benchmarking with the requirements for a new normal of economic developments, other transportation forms and the advanced levels of developed countries, China's railway still faces deficiencies such as incomplete layout, low operational efficiency and rather severe structural conflicts. By the end of 2021, the nationwide railways in operation exceeded 150,000 kilometers; among which, the high-speed railways in operation ran over 40,000 kilometers, indicating the increasingly prominent key role of railways in the modern comprehensive transportation system.

According to the industry statistics released by the National Railway Administration, in the first half of 2022, the railways nationwide had achieved a passenger traffic volume of 0.787 billion people, representing a year-on-year decrease of 42.34%; meanwhile, the outbound freight tonnage had reached 2.481 billion tonnes, representing a year-on-year increase of 4.86%.

Total passenger — kilometers ('00 million passenger-kilometers)	42.86	63.32	(32.31)

- The increase in revenue from passenger transportation was mainly due to the following:** After the commencement of operation of the Ganzhou-Shenzhen high-speed railway on 10 December 2021, the Company successively opened some pairs of cross-network long-distance EMU trains in the direction of the Ganzhou-Shenzhen high-speed railway; and from 1 April 2021, the Company actively applied to the competent authorities of the industry for the addition of some pairs of cross-network long-distance EMU trains, which contributed to the increase in revenue from long-distance trains.
- The decrease in passenger traffic volume was mainly due to the following:** During the reporting period, COVID-19 cases were reported frequently in various regions or places in China, and local governments adopted relatively strict pandemic prevention and control measures, which greatly restricted the movement of personnel across regions, thereby resulting in a significant drop in the passenger traffic volume.

## (2) Freight Transportation

### (3) Railway Network Usage and Other Transportation Services

Railway network usage and other transportation services provided by the Company mainly include passenger and freight transportation railway network usage, provision of railway operation services, locomotive and passenger car leasing, passenger services and luggage transportation. ## 5. ESTIMATES

The preparation of interim financial information requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing this interim condensed consolidated financial information, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements for the year ended 31 December 2021.

## 6. SEGMENT INFORMATION

The chief operating decision-makers have been identified as the senior executives of the Company. Senior executives of the Company review the Group's internal reporting in order to assess performance and allocate resources. The operating segments were determined based on these management reports.

Senior executives evaluate the business from a perspective of revenues and operating results generated from railroad and related business conducted by the Company ("the Railway Transportation Business"). Other segments mainly include on-board catering services, leasing, sales of materials, sale of goods and other businesses related to railway transportation provided by the subsidiaries of the Company. Senior executives of the Company assess the performance of the operating segments based on a measure of the profit before income tax. Other information provided, except as noted below, to senior executives is measured in a manner consistent with that in the financial statements.
